

Connecting to IIT-565 Wireless Network Android Version

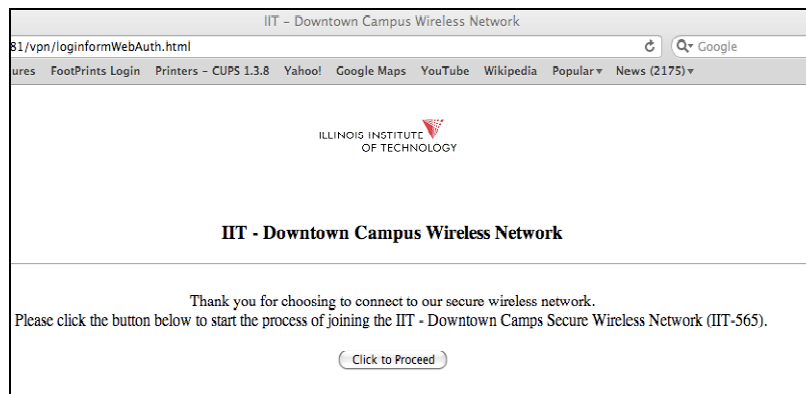

Note: Due to different versions not all Android based phones will work. Currently versions 2.1 and 2.2 are supported.

1. Download the XpressConnect App
 - a. Go to Market and search for XpressConnect

2. Install the XpressConnect App from Cloudpath Networks Inc
3. Go to Settings, Wireless and Networks
4. Turn Wi-Fi on
5. Tap Wi-Fi settings
6. Connect to IIT-Connect
7. Once connected open the browser. If you are prompted for a certificate click to continue
8. When the page below appears Click to Proceed

9. If the page above does not render please type in the following URL:
<https://secureconnect.kentlaw.edu>
10. Choose the 2nd link stating “click on this link to be walked through the configuration of your Android phone”
11. Enter **your complete Chicago Kent or IIT email address** and the corresponding password
12. Click Continue
13. You should now be connected to the IIT-565 wireless network
