Course Descriptions:

Entertainment Law: This course addresses legal considerations that affect the publishing, music, recording, live theater, motion picture, and television industries; special emphasis on laws regarding defamation, right of privacy and publicity, copyright, and unfair competition as they affect the various entertainment industries.

Illinois Civil Procedure: This course is designed to immerse the future practitioner in all aspects of Illinois Civil Procedure, such as the structure of the Illinois court system, personal jurisdiction, venue, statutes of limitation, parties, pleading, motion practice, discovery, relief from judgments, appeals from the trial court, res judicata, and civility in the practice of law. Court decisions, the Illinois Code of Civil Procedure, and supreme and circuit court rules are emphasized by way of the casebook method.

State and Local Taxes: This course provides a study of state income, excise, real property, and franchise taxes; retailer's occupation and related taxes (sales tax); and City of Chicago taxes. Appropriate tax planning becomes more difficult as expanding governmental revenue needs lead to increasingly complicated state and local tax structures. The course is designed to provide a beginning familiarity with the practical aspects of a state and local tax practice, with emphasis on Illinois law.
